AMANDA GUO

Technical Product Manager | ayzguo@gmail.com | LinkedIn | amandaguo.com

SUMMARY

Product leader with **4+ years of combined product, engineering, and design experience** across fintech, insurance, and consulting. Drives cross-functional teams to ship user-facing products with measurable impact: **17% support-volume reduction, 43% user growth, 33% order-flow lift, 95% workflow efficiency gain**. Non-traditional path from design → engineering → product; pairs technical depth with product strategy, user research, and agentic/responsible AI fluency.

EXPERIENCE

Manulife – *Developer Relations Engineer* **June 2025 - Present**

- **Led and motivated a cross-functional product team** to deliver AI and data learning programs end-to-end — defining requirements, prioritizing problems, driving milestones, **resolving blockers, and maintaining team health**.
- Built a self-paced course teaching learners to **build AI agents in Copilot Studio**; part of an agentic AI and low/no-code automation learning path reaching **8,000+ unique learners and 12,000+ engagements globally**; coached hands-on sessions for **400+ participants (NPS 60+)**.
- **Integrated AI and automation** to redesign workflows — including an automated bulk access-request process delivering an **87% efficiency gain** — and **analyzed LMS engagement data, NPS, and qualitative feedback** to inform iterations, diagnosing access issues as a root cause and launching pre-course office hours to fix the process.

Manulife – *Associate Full-Stack Software Engineer* **June 2024 - May 2025**

- **Led product discovery** for a self-serve claims tracking application, translating advisor pain points into product requirements with Design and Engineering — **reducing call-center volume by 17% and increasing unique users by 43%** with **zero post-launch bugs**.
- **Drove milestone execution** across the front-end and back-end (legacy API integration, JWT security, WCAG accessibility) and authored onboarding documentation used to onboard **over half** of new team members.

Wealthsimple – *Software Engineer* **Jan 2024 - Apr 2024**

- Delivered real-time stock-option quotes on mobile, **navigating tradeoffs** between accuracy, latency, security, and accessibility — **driving a 33% increase in options order-flow completion**.
- Led the intern learning group (8 members), hosting monthly development events including a **fireside chat with the CEO**.

Deloitte Digital – *Product Consultant* **May 2022 - Aug 2022**

- **Facilitated strategy workshops with ~20 Product, Design, and Engineering leads** to define and align an **18-month product roadmap**; **drove cross-functional execution** across all scrum teams to deliver beta in 6 months, contributing to a **5x user engagement growth**.
- **Communicated roadmap progress, adoption, and risks biweekly to C-suite executives**, securing buy-in for team restructuring; **advocated for earlier UX involvement**, influencing how teams sequenced design work.

Arctic Wolf – *Product Designer* **May 2021 - Aug 2021**

- **Reframed a technical terminal-based configuration editor** as a user-friendly React application — articulating the product mission around **streamlining new-hire onboarding and increasing customer retention** — with a **95% improvement in publishing time** and a **2x faster build**.
- **Mediated product–engineering disagreement** on architecture by evaluating tradeoffs across user research, scope, and feasibility; shadowed engineers and mapped the user journey to define and launch the MVP in 4 months.

WSIB Innovation Lab – *Product Designer* **Sept 2020 - Dec 2020**

- **Defined success metrics** from product objectives and user research for a COVID-19 self-assessment app; used **A/B testing** and **competitive analysis** to inform design — achieving a **91 usability score** and **100% completion rate**.

Tecsys – *Product Manager* **Jan 2020 - Apr 2020**

- **Led product discovery** for a Retail Order Management System order page (**40% of customer usage**), synthesizing sales interviews and onsite user footage; **triaged conflicting research** and **influenced the team** to prioritize a flagging/notes feature over custom-field fixes — presented to the Director of Product and external stakeholders.
- **Co-presented with the Director of Product** to the R&D organization, securing buy-in for user-centric design processes.

EDUCATION

University of Waterloo, CA | University of Leeds, UK (study abroad) **2018 - 2023**
Bachelor of Computer Science, Specialization in Human-Computer Interaction **GPA: 3.9/4.0**

SKILLS

Product & Leadership: Product Strategy · Roadmap Development · Requirements Definition · Prioritization & Tradeoffs · User Research · A/B Testing · Success Metrics · Stakeholder Alignment · Cross-Functional Leadership · Team Motivation
AI & Data: Agentic AI · Prompt/Context Engineering · Responsible AI · Workflow Automation · SQL · NPS & Qualitative Analysis
Technical: TypeScript · JavaScript · React/React Native · Node.js · REST APIs · Python · Git · Docker
